COMPANY PROFILE

Environmental one-stop shop.

WWW.AVANTEGARDENG.ORG

The background features several overlapping, semi-transparent green geometric shapes. These include a large triangle on the right side, a long horizontal bar at the bottom, and several diagonal bars of varying lengths and orientations that create a sense of movement and depth. The overall aesthetic is clean and modern, with a focus on organic and architectural forms.

Preserving
Tomorrow for
the Future*

Introduction

A holistic view to managing regulatory obligations requires a lot much more than avoiding financial sanctions and penalties from regulatory agencies; it's about protecting corporate image, reputation, integrity and improving operational performance.

With growing stakeholder awareness of environmental issues, ensuring and demonstrating compliance can help companies in attracting potential investors, retain customers (service profit chain) and boost revenue.

Leading companies also perceive issues in environmental compliance as a crucial indicator of broader operational performance issues.

Environmental compliance is not a one-off tick in the box activity...

It's an ongoing commitment and needs to be embedded into every major capital project likewise day-to-day activities operations and asset retirement.

In a continually evolving regulatory landscape, many organizations seek help with understanding and cost effectively meeting their obligations at a local, regional, or national level with a view of exceeding conformity with applicable legal and administrative frameworks.

At Avant-Garde, we provide services to not only achieve environmental compliance, but improve ongoing operational performance.

We align strategy, processes and people, and leverage on innovative tools and methodologies to help our clients in...

- ◆ Understanding the current regulatory legal and administrative framework and anticipate changes
- ◆ The adaptation and management of change
- ◆ Safeguarding current and future operations through business process continuity and strategy
- ◆ Achieving greater energy and resource efficiency
- ◆ Streamlining systems and simplify data management
- ◆ Controlling costs and mitigate environmental risks

About Us

Avant-Garde Limited (AGL) an Environmental One stop shop providing specialized environmental and sustainability management consultancy services to a wide range of clients across numerous sectors.

AGL brings a unique and innovative perspective to environmental management hinged on quantifiable added value and customer satisfaction.
